

Underground Puzzle Game Maze Rescue Gets Gorgeous New Design, International Support and More Nearly Impossible Mazes

Maze Rescue has grown with a gorgeous new design, international support for 10 languages and 15 nearly impossible levels while keeping the classic elements of the maze puzzle players love.

Johannesburg, South Africa 24 August 2017 Liquid Left Solutions has updated it's puzzle game Maze Rescue with 15 new levels, a gorgeous new design and international support. With no one having successfully completed the puzzles we chose to double down and make the challenges even harder.

“I wanted players to rethink their problem solving strategies. This is about strategic planning and thought out moves.” - Victor Meyer, Puzzle Designer & Developer

The original game got the grey matter working but no one successfully completed the classic game with it's 60 levels, so we added some more. The design has been updated with beautiful 3D graphics to pull you into the game and on top of all that we've added support for 10 languages to give even more players the opportunity to win. It may look like child's play but it's that deceptively simple design that lures the average player down the wrong path.

Maze Rescue is Free on the Apple App Store and available for iPhone & iPad with iOS 8 and up.
